

AS-MarketPlace

Free retail shop software

You have opened your first shop and you cannot afford purchasing shop management system yet. Or maybe you have a small shop and it is not expedient to purchase a system. Apricot Software makes a present to all small shops giving new generation AS-MarketPlace system to them for free. You can perform all important operations of a shop with AS-MarketPlace 6 system.

With paid versions of its systems Company Apricot Software offers the companies also free solutions. The free systems are complete systems without any restrictions.

Our trade systems including free AS-MarketPlace system are closely integrated with trading devices and cash control machines.

Integration with Cash control machines and trading devices simplifies sales process and enables to serve customers quickly. Many companies using cash control machines can avoid expenses, which in some cases can be significant, related to buying and implementing trade automation systems by using AS-MarketPlace system.

You need just to download AS-Marketplace system, install it and are ready to start the work.

Simple installation and use

System installation and running are very simple and do not require the presence of technical specialist. Inexperienced users can fully master it in a short time. System technical requirements are not high; therefore, the organization does not usually need to purchase additional hardware or software for system operation.

Does not require special training and extensive implementation work

It is not required to take special training courses. You can get a better insight of the program via digital resources.

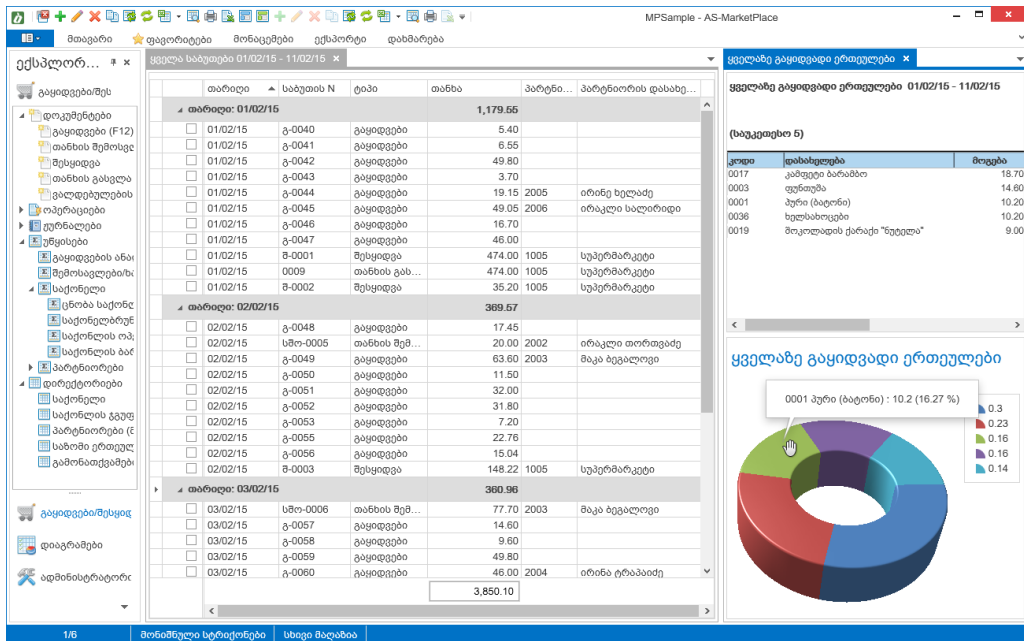

About Us

Apricot Software was founded in March 2014.

We represent **Armsoft's** accounting and trading software in Georgian market.

Founded in 1987, ArmSoft is the oldest private company in Armenia. Armsoft is the absolute leader in accounting, banking and trading software market in Armenia. Its' systems are being used by more than 7000 companies.

The company has 27 years experience in the market, deep knowledge of the best technologies of the field and how to implement them into its systems. And, probably the most important, clear understanding that even the best systems can be of little use to customers if they don't come along with excellent support. Along with the best accounting systems we inherited Armsoft's idea and experience of providing excellent customer support. We know accounting is not easy. And to really help you with your work, we have a professional team working for you. This means people who not only can advise you how to use your AS systems best, but who also have deep knowledge in accounting, taxes, reporting and who follow all the legislative changes to inform you in time and to keep your system up to date.

The screenshot shows the 'AS-MarketPlace' software interface. The main window displays a table of data with columns for 'თარიღი' (Date), 'საბუთის N' (Document No.), 'ტიპი' (Type), 'თანხა' (Amount), 'პარტენ...' (Partner), and 'პარტნიორის დასახე...' (Partner Name). The table is grouped by date, showing subtotals for 01/02/15, 02/02/15, and 03/02/15. A pie chart on the right, titled 'ცვლადი გაყიდვადი ერთეულები' (Variable sold units), shows a distribution of data points. A tooltip for the '0001 შური (ბატონი)' category indicates a value of 10.2 (16.27%).

Integration with Revenue Service

No more need to manually enter invoices and waybills to Revenue Service. Just upload them from AS-MarketPlace to Revenue Service system, or download received and sent documents from web page.

Modern, beautiful and comfortable interface

- System interface is built in familiar and comfortable MS Office style. It enables the users to start easily the work with the system and avoid inconvenience and time spent on learning the new working environment
- The system works in Unicode which makes it possible to work with data inputted in any language
- Various verifications done during the input ensure data integrity and accuracy
- The system has different colors and font themes. Each user can choose the most convenient view for him

Powerful and flexible reporting system

The tools of data filtration, grouping, adding subtotals, and column selection enable the users to easily receive any data from the system.

Analytical diagrams

The graph chart of the main indicators of business efficiency in one window
